## **WHEN ORDERING A OCTAGON SPA COVER**

The most common mistake customers have is, determining that their spa really is an octagon. The width and length of an octagon cover must be the same. The same applies for the sides of the cover. If your sides measure differently, then you do not have an octagon! You have a square cover with cut corners.

All covers are made to your specifications. We will not be held responsible if you measured incorrectly. If you need assistance in determining, the type of cover you have, please ask a sales associate for assistance. In some cases, a service fee may apply.
